

Course Brochure

Unit of Competency TLID3011A Conduct a specialised forklift operations.

Who is the course designed for?

Generally this course is usually offered for existing forklift operators requiring up-grading of the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, including checking attachments and worksite for suitability, selecting the type of forklift and accessories for required load shifting tasks, and shifting load and completing work in accordance with operational requirements.

This course is designed for participants in various retail, wholesale, warehousing construction, farming etc. Completion of this qualification no longer is used for licencing.

The course provides a pathway leading onto a full qualification in Transport and Logistics (TLI10). Legal limitations or pre-requisites exist on the qualification that may hamper the obtaining of a licence from the licencing authority.

Students can contact the licencing authority for qualification criteria and advice. The contact phone number for SafeWork NSW is 131050.

What does the course offer?

The program has been organised to provide students with general skills, background information and specific knowledge about operating a forklift, which is then applied in discussion, questioning, role-plays and practical application for the industry specific unit.

The program is delivered off-the-job at our main training centre in Moorebank NSW (or various other locations) and/or on-the-job at the clients premises. Training delivery combines face-to-face trainer led theory classes and practical sessions involving small group and individual activities including peer critical evaluation scenarios, questioning, role-plays and simulations.

Candidates are provided with a training manual that covers all parts of the course. Additional material will be made available during training sessions if required.

How are students assessed?

Students will undergo a theory and practical test. Upon successful completion a "Statement of Attainment" will be issued to the trainee. It is a closed book test and no outside assistance is allowed. Groups can sit for the test at one time providing there is sufficient separation. The practical test requires the completion set tasks using a compliant forklift and/or attachments.

If a student has difficulty with written English the theory test may be given orally, but arrangements must be made at time of booking.

Checklist for clients prior to assessments

Compliant Forklift and Assessment Area (if conduct on-site).

- 🍏 Forklift and/or attachments is in safe operating condition and complies with the requirements of the relevant state legislation.
- 🍏 You have the ability to stack loads to low, medium and full lift height of the forklift. i.e. pallet racking or block stacking.
- 🍏 You will need to ensure that sufficient space is available for manoeuvring. It is important that loads are available that are equivalent to approximately 50% of the forklifts lifting capacity. i.e. If the forklift load capacity plate shows 1000 kg the loads for the assessment should be between 500kg and 1000kg.

Individual Requirements

- 🍏 Students must be over 18 years old and possess an LF class high risk work license.
- 🍏 SafeWork LF license must be sighted by the trainer at commencement of the course.
- 🍏 PPE appropriate to your work site (or if at the training centre long sleeve shirt, pants and your work boots) must be brought to the assessment.
